Waltham Abbey

EN9 1XA

Proposal: Application for approval of details reserved by condition 2 'contaminated land - phase 1', 3 'contaminated land phase - 2', 4 contaminated land - remediation scheme', 5 'contaminated land - verification report' and 6 'contaminated land - not previously identified' on planning application EPF/2270/17 (Conversion of existing offices into 24 self contained flats. The existing offices have the exclusive benefit of 36 off-street parking spaces in total, 18 to the rear of each block and would represent 1.5 spaces for each of the proposed on-bedroom flats. The traffic movements would be significantly lower as a result of the change of use to residential. There has been no history of either building for any use which would result in soil contamination of any form. The Environment Agency records show that the buildings are located where the flood risk from rivers or the sea is very low, the flood risk from surface water is low, and the only risk of flooding in this area is from reservoirs, specifically the Cobbins Brook FAS, owned by the Environment Agency. However, the information data confirms that there has been no loss of life in the UK from reservoir flooding since 1925, and this situation has not prevented development of this site, and adjoining land, in recent years. The adjoining commercial premises do not produce noise nuisance which would impact on the living conditions of the proposed new residents. Existing modern residential accommodation is nearby).
